Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4,8 and 9 are are, drawn to an adhesive composition, classified in class 428, subclass 190.
- II. Claims 5-9 are drawn to method of making adhesive composition, classified in class 156, subclass 325.
- III. Claims 10-13 are, drawn to drawn to a tire body, classified in class 152, subclass 458.

17

The inventions are distinct, each from the other because:

Inventions III and I are distinct and separate from each other because Invention I relates to an adhesive composition while Invention III relates to a tire body.

Art Unit: 1774

Inventions II and III are distinct and separate from each other because Invention II teaches a method of making an adhesive composition while Invention III relates to a tire body.

18

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by heating both the thermosetting phenolic adhesive and pigmented dispersion to cause reaction therewith.

19

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

20

Art Unit: 1774

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

21

A telephone call was made to applicant's attorney, R. Seide on 5-17- to request an oral election to the above restriction requirement, but did not result in an election being made.
